

Azure Session Q & A

1. How do you install Azure PowerShell CLI?
Install the Azure CLI for Windows, Linux or macOS: <https://docs.microsoft.com/en-us/cli/azure/install-azure-cli>
2. Can you use terraform or ansible templates in Azure?
Yes. They are the preferred tools for multi-cloud environments:
<https://azure.microsoft.com/en-us/solutions/devops/terraform/>
3. Does the credit applied for new accounts apply to all services?
Yes. The credit can be used for any service that is not free: <https://azure.microsoft.com/en-us/free/>
4. Can you delete resources using Cloud Shell?
Yes. Any operation done in the portal can be done using Azure CLI:
<https://azure.microsoft.com/en-us/blog/azure-cli-2-0-new-commands-features-available-now-in-azure-cloud-shell/>
5. How do you use RDP to connect to a VM?
Install the RDP app and connect to the IP of the Azure VM. Additional services available with the Bastion feature: <https://azure.microsoft.com/en-us/blog/manage-rdp-and-ssh-connectivity-at-scale-with-azure-bastion/>
6. What are the implications of using solutions that are in Public Preview?
There might be limitations on the SLA. Review the documentation for the related service:
<https://azure.microsoft.com/en-us/support/legal/preview-supplemental-terms/>
7. What are the specifics on the cost of data transfers?
Data transfers in are free. Other transfers might be charged: <https://azure.microsoft.com/en-us/pricing/details/bandwidth/>
